- [SYSTEM CALL mode] [ZONE4 mode]
- The AVR-2809CI cannot be used in the ZONE4 mode.
- For details, refer to the component's operating instructions.

Presetting

The included main remote control unit can be preset to operate devices of various brands.

- Press [MODE SELECTOR] for the device you want to preset.
- Press and hold in [RC SETUP] for at least 3 seconds. The signal transmission indicator flashes twice.
- Press [NUMBER (1 - 8)] and input the 5-digit number of the brand of the component to be preset. The numbers are shown in the Preset Code Table (see End of this manual).
 - When the code is registered, the signal transmission indicator flashes twice.
 - When the preset code is transmitted, the mode indicator for the component to which that code belongs flashes.
 - The input mode is canceled if no button is operated for 10 seconds.

Some brands have more than one preset code. If the component does not operate, try inputting a different code.

Operating Preset Components

- Press [MODE SELECTOR] for the component to be operated.
 - The mode indicator of the device to be operated flashes.
